

terton Parish Council Play Park Covid 19 Risk Assessment		Assessment Date - 14th July 2020				
		Review Date - 14th November 2020				
Activity	What hazards are present	Who is at risk?	Potential Injury Severity	Precautions in place	Probability	Risk Rating
Children playing in park grassed areas	Possibility of catching airborne virus from other people in park	Children and nearby adults	Medium	- Parents to ensure theirs and childrens hands are cleaned with hand sanitiser prior to entering the park and on leaving.		
				- Parents to ensure social distancing between themselves, their children and other park visitors		
				- Parents to ensure face coverings are worn in situations where social distancing is not possible		
				- Parents are encouraged to time limit their stay during busy times	Current research indicates low risk of catching virus outdoors and of the virus surviving for long periods outdoors when exposed to high UV light levels.	Low-Medium
Children playing on park equipment	Possibility of catching virus present on hard surfaces	Children and adults they contact with	Medium	- Parents to ensure theirs and childrens hands are cleaned with hand sanitiser prior to entering the park and on leaving.	Current research indicates low risk of catching virus outdoors and of the virus surviving for long periods outdoors when exposed to high UV light levels.	Low-Medium
Adults supervising children	Possibility of catching airborne virus from other people in park	Adults	Medium	- Parents to ensure social distancing between themselves, their children and other park visitors		
				- Parents to ensure face coverings are worn in situations where social distancing is not possible		
				- Parents are encouraged to time limit their stay during busy times	Current research indicates low risk of catching virus outdoors and of the virus surviving for long periods outdoors when exposed to high UV light levels.	Low-Medium
